

Service Summary

Application Development & Integration

Total Project Life-Cycle Management
Dot Aussie® Application Design, Development, Deployment and Support
Standalone / Internet / Intranet Applications
Integration with legacy systems
Disaster Recovery
Visual Basic, Visual Interdev, Lotus Notes, Domino, Java,
SQL Server, Access, IIS, Linux, VBA, others...

Networking

MCSE Engineer	Network Design
Installation	Configuration
Application Deployment	Ongoing Support
Custom Applications	Server configuration
Email and internet gateways	Equipment Procurement
Complete system maintenance contracts	Software application support

Maintenance

Ongoing maintenance contracts	Interfacing legacy systems
Software and hardware upgrades	Troubleshooting
Future requirements analysis & planning	PC & Macintosh support

Building Management Systems

On-call problem solving 24x7
Controller programming & training
Remote monitoring of system & instant alert paging devices
Graphical front-end design, development, installation & maintenance
Wide range of brands and languages supported
Software and hardware maintenance & upgrades
Hardware troubleshooting

Video, Photography & Multimedia

Shooting & editing
Corporate promotional & training videos (DV/VHS/VCD/DVD)
Computer delivery medium available
Underwater photography & video
Photography & digital manipulation

Call 0429 414 000 (24 hrs)

Service Summary

Programmable Logic Controllers

Design, development and debugging of PLC based systems
Industrial and commercial applications
Solutions to safety issues
Remote monitoring & instant alert paging devices

SCADA Systems

Design, development and debugging of SCADA systems, e.g. Citect
Industrial and commercial applications
Remote monitoring & instant alert paging devices

Embedded Devices

Complete design, development and debugging
Proven designs using Dallas, ATMEL, PIC, etc.
Embedded Java & Ethernet connectivity
Develop in C and numerous assembly languages

Macintosh Network

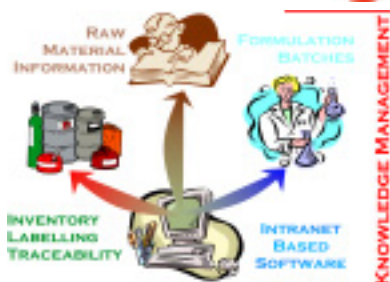

Network design and installation	Software application support
Complete system maintenance contracts	Server Configuration
Email, internet, and web application gateways	Graphic design

Products

Intranet Laboratory Management System
BMS Messenger Instant Paging System
